

Dymin Systems Inc. Terms and Conditions of Service

This agreement ("Agreement") is between Dymin Systems Inc. and an end user ("End User") of the Dymin Systems Inc. VoIP Voice Service. Any Dymin Systems Inc. services or products ("Services") provided to End User shall be governed by the terms and conditions herein. By activating the Services, End User acknowledges receiving, reading and understanding this Agreement and accepts the terms and conditions herein. End User acknowledges that they are of legal age to enter into this Agreement.

1. TERMS AND CONDITIONS. The terms and conditions stated herein are in lieu of and replace any and all terms and conditions set forth in any documents issued by End User, including, without limitation, purchase orders and specifications. Any additional, different, or conflicting terms and conditions on any such document issues by end user at any time are hereby objected to by Dymin Systems Inc., and any such documents shall be wholly inapplicable to any sale made or service rendered hereunder and shall not be binding in any way on Dymin Systems Inc. No waiver or amendment to this contract or these terms and conditions shall be binding on Dymin Systems Inc. unless made in writing expressly stating that it is such a waiver or amendment and signed by a duly authorized representative of Dymin Systems Inc.

2. TERM. The term of this Agreement ("Term") begins on the date that End User purchases Services and continues monthly, beginning at the 1st of each month for the duration of the service period which expires at the end of each calendar month. At the end of the current Term, the Term is automatically renewed unless End User provides Dymin Systems Inc., prior to the end of the current Term, notification of intention to terminate the service. End User agrees to pay for Services for the duration of the Term. Expiration of the Term does not alleviate End User of responsibility for paying all unpaid, accrued charges due hereunder. For End Users who choose to rent equipment, if the End User chooses to terminate the Services before the end of the current rental term, disconnection fees may apply.

3. VOIP 911 SERVICES NOTICE:

Customer understands, acknowledges, and accepts the following:

a. 911. End User acknowledges that Dymin Systems Inc.'s Services do not support traditional 911 emergency dialing, whereby calls are automatically routed to an emergency 911 operator with the caller address appearing on the operator's computer. Dymin Systems Inc. does offer E911 services as mandated by the FCC in which end user 911 dialed calls are routed to the nearest Public Safety Answering Point office (PSAP). Typically these calls are answered by the front desk of the PSAP and then routed to an emergency operator at that location. However, some PSAP's will not accept calls in this manner. End-User agrees to notify, as appropriate, any of its users of the Services who may place calls using End-User's phone services. Dymin Systems Inc. advises End-User to maintain an alternative means of accessing traditional 911 services such as traditional telephone services or cellular phone services. The Dymin Systems Inc.-provisioned 911 service (the Service) routes VoIP V911 calls via native 911 solution where Dymin Systems Inc.'s backbone provider, Intrado, and or other providers has access to the E911 service infrastructure. Dymin Systems Inc.'s backbone provider must obtain and is diligently pursuing to secure the following from E911 service providers:

- Mechanism to route a VoIP V911 call to an appropriate Selective Router via the PSTN
- Deployment of infrastructure to route VoIP V911 call to an appropriate Selective Router.
- Permission to provision and permission to steer off the regional ALI databases. For regions where the service provides a native 911 solution, the following limitations apply:
 - In the event of an address geo-coding or MSAG validation failure, the error records can not be processed in real-time; commercially reasonable efforts will be made to resolve the records in error. There may be instances that will prevent the correction of errors, causing delays in provisioning the Subscriber's data into the provisioning systems. Addresses in error that can not be resolved will be returned to the Customer for handling individually with the Customer's subscriber.
 - The Service is predicated on using primary wireline PSAP boundaries for routing Services emergency calls to the appropriate PSAP. The primary wireline boundary information is collected and is entered into a database for real-time queries for PSAP boundary lookup. Customer acknowledges that primary wireline PSAP boundary data may not be available for the entire United States and that this 911 service is dependent on the PSAPs to provide such information resulting in the use of wireless PSAP boundary data to route a VoIP emergency call. For regions where this Service provides a non-native 911 solution, the following limitations apply:
 - The Service uses wireless PSAP boundaries when a primary wireline PSAP boundary is not available. Therefore, the 24x7 PSAP DN provided to Customer when a Customer VoIP Subscriber places an emergency call may correspond to a PSAP other than the PSAP that would normally receive wireline emergency calls placed from the Subscriber's location.
 - Customer VoIP Subscriber physical service address and call back number will not be presented to the PSAP.
 - In the event caller cannot speak, Customer acknowledges that no information will be provided to the PSAP to contact the Customer to obtain information that could allow them to dispatch emergency services to caller's location. Each PSAP's internal processes will dictate how the call should be handled. For emergency call routing using the Emergency Call Routing Center (ECRC) (i) in the event caller cannot speak or identify their address, (ii) data connectivity between the Customer VoIP Subscriber address database and the ECRC is interrupted, and (iii) Customer's NOC cannot provide the Customer End Subscriber's location information, Customer acknowledges that Dymin Systems Inc. or Dymin Systems Inc.'s backbone service provider(s) has no further ability to assist the caller and Customer agrees to indemnify and hold harmless Dymin Systems Inc. from all third party claims arising from such circumstances. Although subject to change, Intrado, Inc. is currently our 911 backbone service provider.

b. Outages due to Electrical, Internet or other General Failures. End-User acknowledges that the Services will not function in the absence of electrical power, access to the Internet or other general failures associated with the VOIP network. End-User acknowledges that the Services will not function if there is an interruption of End-User's broadband or high-speed Internet access service.

c. Non-Voice Systems. End-User acknowledges that the Services are not set up to function with non-voice systems including but not limited to security systems, fire alarms, credit card terminals, medical monitoring equipment, satellite television systems, and some facsimile systems. By consenting to these terms and conditions, End-User waives any claim against Dymin Systems Inc. for interruption or disruption of such systems by the Services.
